SPX Communication Technology Appoints Hans Dahlén as International Sales Manager for Europe, Asia, and Africa

RAYMOND, Maine — Nov. 18, 2010 — SPX Communication Technology (formerly Dielectric) today announced that Hans Dahlén has joined the company in the role of international sales manager for the European, Asian, and African regions. While providing dedicated support to customers in these regions, Dahlén will oversee the sale of Dielectric® antenna systems, transmission line, switching and patching components, and transmission accessories; wireless telecom broadcasting technologies; and Flash lighting and monitoring products.

“We’re very pleased to welcome Hans to our team and look forward to leveraging his product expertise, particularly in low-power broadcasting technologies, as well as his extensive knowledge of the European, Asian, and African markets,” said Garrett VanAtta, president of SPX Communication Technology. “By bringing Hans on board, we are further developing our role in the international broadcast and telecom markets, and we look forward to providing more local support for our customers in these key regions.”

Dahlén joins SPX Communication Technology from Exir Broadcasting and Telecom AB, where he served as general manager for the company’s broadcast division and coordinated its product research and development, budgeting, production, sales, and support activities. Dahlén has more than 13 years of experience with Exir and recently helped the two companies to form a close partnership for developing and launching low-power broadcast transmission systems. Formerly he served as marketing director for Teracom Components AB and has also held regional sales manager and product line manager positions within the same company. In his new role with SPX Communication Technology, he will continue to reside in southern Sweden.

SPX Communication Technology’s current international sales manager, Federico d’Avis, will continue to actively manage international sales in Latin America and Canada. By devoting each
